Information sheet

entrance hall videos & LED-lights

The whole Planet.tt entrance hall is assembled with a fully DMX-controllable RGB LED-light system and is able to adapt its style or mood of illumination to every kind of event. Moreover we have two projected areas and 13 High Definition large format LCD-monitors and the possibility to play up to three independent videos grouped individually on the projectors and monitors.

- If you plan to play your own video-loop you can bring it on a data-storage medium or on a playable DVD.

- If you want to connect your own video player you can do it via RGBHV / VGA.

- If you want to add a video to our Planet.tt Loop please upload it onto a ftp-server and send the download-info to Martin Kames or send / bring it to us directly on a data-storage medium. <u>Please DON'T send it on a DVD-player playable DVD! Just Data-Disc, USB-Sticks or Download!</u>

For all requests contact the Planet.tt video technician Martin Kames martin@planet.tt !
